## THE INTERNATIONAL PACIFIC RESEARCH CENTER

Conceived under the “US–Japan Common Agenda for Cooperation in Global Perspective,” the International Pacific Research Center (IPRC) was established in 1997 within the School of Ocean and Earth Science and Technology at the University of Hawai‘i at Mānoa. The IPRC mission is “To provide an international research environment dedicated to improving mankind’s understanding of the nature and predictability of climate variations and change in the Asia-Pacific region, and to developing innovative ways to utilize knowledge gained for the benefit of society.” The core support for the IPRC comes from the State of Hawai‘i through the University and from the principal supporting agencies: the Japan Agency for Marine-Earth Science and Technology (JAMSTEC), NASA and NOAA. Financial support for our research is also provided by other government agencies in the US and abroad. The IPRC now has an annual budget of roughly 7 million dollars.

Asia and the Pacific region are home to over half the world’s people, all of whom are affected by variations in

the climate system. IPRC researchers conduct modeling and diagnostic studies to document these variations and understand their causes, whether such causes are purely natural or have a human component. Through advances in basic research, the IPRC contributes to improving environmental forecasting for the Asia-Pacific region. One focus of IPRC investigations is the understanding of key phenomena rooted in the tropics, such as the El Niño-Southern Oscillation of the ocean-atmosphere system, monsoon circulations, interannual variability in the Indian Ocean, intraseasonal oscillations of the tropical atmosphere, and tropical cyclones. Other examples of important issues for IPRC study include the nature of decadal variability in the extratropical North Pacific Ocean, the dynamics of the very strong Kuroshio and Oyashio ocean currents in the western North Pacific and the role of marginal seas in the climate system. Concerns about climate change are addressed through modeling studies of past climate and through assessment of model predictions for future trends in climate.

## 国際太平洋研究センター

国際太平洋研究センター(IPRC)は、「地球的展望に立った協力のための日米共通課題」のもと、1997年にハワイ大学マノア校の海洋地球科学技術学部内に設立されました。その使命は、「国際色豊かな研究環境を創り、アジア・太平洋地域の気候変動及び変化について、その性質と予測可能性に対する人類の理解を向上させ、そして得られた知見を社会に役立てるために活用する革新的な手段を生み出すこと」です。IPRCの研究費は主に、ハワイ大学を通してハワイ州から、また主要支援機関である海洋研究開発機構、NASA、NOAAから支援されています。内外のその他の政府機関からも支援を受けており、現在およそ七百万ドルの年間予算により運営しています。

アジア・太平洋地域は世界人口の半分以上が居住する地域で、気候系の変動はこれらの人々

すべてに影響を及ぼします。そのような気候変動には純粋な自然現象であるものも人類活動が関係したものもありますが、IPRCでは、それらを記述し原因を探るため、モデルによる研究や診断的研究を実施しています。このような基礎研究を進展させることでアジア・太平洋地域の環境予測の改善に大きく貢献しています。現在IPRCでは、エルニーニョ・南方振動、モンスーン循環、インド洋の経年変動、熱帯大気の季節内振動、そして熱帯低気圧といった、熱帯起源の現象に注目して研究を行っています。その他の重要な課題として、北太平洋亜熱帯域における十年規模変動の性質、西部北太平洋の強い海流である黒潮・親潮の力学、気候系での縁辺海の役割に関する研究を行っています。さらに、過去の気候のモデル研究やモデルによる将来予測の評価により、気候変化に関する様々な課題に取り組んでいます。

## FOREWORD

This report summarizes the activities of the International Pacific Research Center for the period April 1, 2011–March 31, 2012. The IPRC performs research to enhance understanding of the nature and mechanisms of climate variability and change and to improve the tools for modeling and forecasting the climate system.

The IPRC now has a scientific staff of over 50 including faculty, researchers, postdoctoral fellows, and long-term scientific visitors. IPRC faculty also supervise several graduate students in the Meteorology and Oceanography departments of the University of Hawai'i at Mānoa. In addition, through our Asia-Pacific Data Research Center (APDRC), the IPRC operates a web-based server system that makes data resources readily accessible to IPRC researchers, the international climate community, and the wider public.

This Annual Report omits the extended narratives on individual projects that had been a feature of earlier reports. Note that selected IPRC **research highlights** are reported quarterly on our web site. Also, starting in 2012, the **list of publications** on our web site has links for easy access to each paper's abstract. Finally the IPRC's semiannual newsletter, ***IPRC Climate***, includes brief reports on highlights of ongoing research projects and other activities at the IPRC. Issues of the *IPRC Climate* are available online.

The staff of the IPRC are grateful to our principal supporting agencies JAMSTEC, NASA and NOAA, and to the State of Hawai'i for its sponsorship of the IPRC through the University of Hawai'i.
